

CommScope imVision® Solution

Intelligent Automated Infrastructure Management (AIM)

Overview

CommScope imVision® is an advanced Automated Infrastructure Management (AIM) solution that provides real-time visibility and control of your physical network infrastructure. It automatically monitors copper and fiber connections across enterprise campuses and data centers, ensuring accurate documentation and immediate detection of changes. imVision eliminates manual tracking, reduces operational risks, and improves network reliability by turning the physical layer into an intelligent, manageable asset.

What imVision Does

- ✓ **Monitors all** patching activity in real-time
- ✓ **Automatically** detects device connections and disconnections
- ✓ Maintains continuous, accurate infrastructure documentation
- ✓ **Provides** end-to-end connectivity visibility
- ✓ Issues alerts for unauthorized or unplanned changes
- ✓ **Guides technicians** during Moves, Adds & Changes (MACs)
- ✓ **Generates** asset, utilization, and compliance reports

Smart ELV Solutions by SLT

- ✓ Structured Cabling Solutions – **CommScope**
- ✓ Active Network Infrastructure Solutions – Cisco, Huawei, Aruba
- ✓ Wireless Networking Solutions
Cisco Meraki, Huawei, Aruba
- ✓ Smart Security Surveillance Solutions
Hikvision, Dahua, Axis
- ✓ Access Control Systems – Hikvision
- ✓ Unified **Communication Systems** – Avaya, Grandstream
- ✓ Smart Racks – Huawei
- ✓ Smart Classroom & Boardroom Solutions – Poly
- ✓ Environment Monitoring Solutions – Room Alert

Key Components

-  **Intelligent Copper & Fiber Panels** with embedded sensing technology
-  **imVision Controllers** for real-time data collection
-  **Web-Based Management Software** for centralized monitoring and reporting
-  **LED Port Guidance** for faster, error-free patching

Customer Benefits

-  **Operational Efficiency**
Eliminates manual documentation, reduces troubleshooting time, accelerates service px.
-  **Enhanced Security**
Detects unauthorized changes instantly with full audit trail for compliance
-  **Optimized Asset Utilization**
Identifies unused ports and infrastructure to support better capacity planning and cost control
-  **Scalable & Future-Ready**
Supports high-density enterprise and data center environments with centralized management across multiple sites

Organizations using **imVision®** benefit from

- ✓ **Reduced operational costs**
- ✓ **Faster deployment and provisioning**
- ✓ **Improved compliance readiness**
- ✓ **Lower risk of human error**
- ✓ **Stronger return on infrastructure investment**

Integrated Security & Communications Solutions

- ▶ **Access Control Systems**
Card, keypad, and biometric access solutions for secure entry management.
- ▶ **Time & Attendance Systems**
Track employee hours with advanced time clock systems.
- ▶ **IP Surveillance Systems**
High-definition CCTV cameras with remote viewing capabilities.
- ▶ **Wi-Fi & Network Solutions**
Setup and maintenance of robust Wi-Fi and network infrastructure.
- ▶ **Data Center Solutions**
Server, storage, and network solutions for secure data management.
- ▶ **Intercom Systems**
Clear and reliable communication through advanced intercom and PA systems.
- ▶ **Versatile Call Systems**
Unified call center solutions for efficient communication.
- ▶ **Paging Systems**
Effective paging and announcement solutions for businesses.

Advanced PABX COMMUNICATION SYSTEM

Seamless IP, Digital, and Analog Connectivity

Our advanced **PBX Communication System** delivers seamless IP, Digital, and Analog connectivity, powered by world-class brands including:

NEC **SIEMENS** **FANTEL** **DINSTAR**

Ensuring Reliable, Scalable & Crystal-Clear Business Communication for Organizations of Every Size

Reliable Solutions for Every Business

ACCESS CONTROL SYSTEMS

Secure Your Premises with Advanced Access Control Solutions

Protect Your Property with Advanced Access Control

Access control systems are essential for ensuring only the right individuals enter sensitive areas of your premises. SLT Mobitel provides state-of-the-art access control solutions to enhance your security through advanced technology features including fingerprint scanning, facial recognition, access cards, and passwords.

Rolein Your Property

- Fingerprint Scanning**: Ensure secure entry with advanced biometric technology.
- Access Cards**: Easily manage entry with programmable access cards.
- Secure Passwords**: Set unique PIN codes for personalized access control.
- Facial Recognition**: Enhance entry security by using facial recognition technology to identify your employees.

Your Trusted Security Partner

Choose SLT Mobitel, your trusted partner in advanced access control solutions. We are committed to providing reliable, cutting-edge technology to safeguard your premises.
