FIRE UP APPLICATION LAYER SECURITY WITH **SLT-MOBITEL** **WEB APPLICATION FIREWALL**

Application Layer, being the closest layer to the end-user, has the largest threat surface and highest vulnerability level which can cause:

Performance and Stability Issues

Data Theft

Network Unavailability

Financial Losses

Business Discontinuity

SLT-MOBITEL WAF

Our Web Application Firewall is equipped with a broad set of monitoring and assessment tools backed by the industry leader in application security, F5, to virtually patch application vulnerabilities, enabling unprecedented levels of:

Security

Confidentiality

Availability

Performance

Integrity

for your mission-critical applications.
